EXPERIENCE

ServiceNow, Inc.

Hyderabad

Software Engineer

July 2024-present

- Contributed to **Project Greenlight**, an automated testing flow that reduced manual testing effort by 80% across the application.
- Grants Management – Persona-Based Access Control**: Implemented ACLs and Script Includes to enforce data access boundaries between Program Manager and Business Contact personas, scoping visibility and actions to each role's responsibilities.
- Grants Management – UI Builder Data Layer**: Built **GraphQL** Data Brokers in UI Builder, invoked via Client Scripts, to fetch and mutate grant program/application records, reducing payload size and improving page load speed for both personas.
- Accessibility & UI Compliance**: Partnered with feature teams across PSDS to identify UI implementation gaps and drive WCAG compliance, reducing accessibility defects by 40% release-over-release.
- Developed and customized ServiceNow Playbooks and Portals while resolving customer-reported production issues, maintaining SLA compliance across releases.

Tata Consultancy Services

Pune

Assistant System Engineer (Backend Developer)

2021-2022

- Contributed to cloud migration tooling on **AWS**, working on Spring Boot-based backend services, database integration with **PostgreSQL**, and secure reporting features.
- Built and optimized a Spring Boot-based monolithic backend with **REST APIs**, leveraging **multithreading** and asynchronous processing.
- Implemented **role-based authentication** and data encryption strategies, strengthening application security and preventing vulnerabilities flagged in internal audits.
- Automated **document generation** (Excel, Word, ZIP) for client reporting pipelines, cutting manual effort and improving SLA compliance.

PROJECTS

ActionLens | *Python, Tensorflow, HuggingFace, Git* Live Demo | GitHub

- Designed a hybrid EfficientNet + BiLSTM + Transformer video classification model achieving 89.9% accuracy on UCF101; built live inference REST API with FastAPI, containerized with Docker, deployed on HuggingFace Spaces with a production frontend

DB Visualizer | *Java, Spring-Boot, React* Live Demo | GitHub

- Built a full-stack SQL schema visualization tool using Spring Boot and React Flow. Parses DDL files and renders interactive ER diagrams with FK relationship mapping.

DiffSight: Bone Fracture Detection | *Python, PyTorch, Matplotlib, Jupyter Notebook*

- Built a deep learning pipeline using attention + diffusion models for X-ray fracture detection, achieving 74.3% mAP on GRAZPEDWRI-DX (from 65.8%).

TECHNICAL SKILLS

Languages: Java, C++, Python, C, JavaScript, GoLang

System & Backend: Spring Boot, Django-REST, FastAPI, RESTful APIs, Hibernate, Data JPA, CNN, Transformers, PyTorch, Tensorflow

Cloud/Databases: MySQL, PostgreSQL, AWS (Certified)

Core Areas: Algorithm, Operating System, DBMS, Computer Networks, Multithreading, Concurrency

Developer Tools: Git, Jenkins, Postman, TortoiseSVN, Visual Studio Code, Spring tool suit

ACADEMIC EXCELLENCE

National Institute of Technology, Warangal, TS

CGPA: 8.00

M.Tech Computer Science & Engineering

2022-2024
